About Me

Hello, My name is Malie Bertram. I am a software & audio engineer. I started out at thirteen years old, building static websites in my free time. Later I got into CMS's which eventually brought me to real programming languages.

At the moment I am based in Berlin, Germany. I have a passion for music, technology and (human) languages, three of which I speak fluently: German, English & Spanish. I got my degree in audio engineering out of pure interest and dove into the world of code right after. Since then I have been both self-employed & employed at mid-sized firms for multiple years.

Here are some fun facts about me:

- I am a certified Yoga Teacher
- I play 4 instruments
- I've worked on 3 published studio albums
- I lived in India for four years
